

Exam (1)

Choose the correct answer:

1- The gas which is produced from photosynthesis process is

a- Oxygen b- carbon dioxide c- Nitrogen

2- Plants take from the air to make its food.

a-oxygen and sunlight
b- carbon dioxide and sunlight

3-The is not from basic needs of plants in initial growth.

a- sunlight b- soil c- water

4- carries water from soil to leaves of the plant.

a- Stem b- roots c- leaves

5- the photosynthesis process takes place in

a- roots b- stem c- leaves

6- When a plant is placed in sunlight, its leaves become

a- pale green b- dark green c- yellow

7- The roots of the plant absorb from the soil to help it grow.

a- water and carbon dioxide
b- water and nutrients
c- sunlight and carbon dioxide

8- If we put a been seed in a, it may germinate.

a- dry soil b- dry paper towel c- wet paper towel

9- The plant food is

- a- Carbohydrates b- protein c- sugar

10-,are from basic needs of plant to survive.

- a- Water and Soil b- Soil and sunlight c- Water and sunlight

11- In photosynthesis process, plant producesto get energy.

- a- fruits b- Oxygen c- Sugar

12- The plant makes process to make its food.

- a- respiration b- photosynthesis c- absorption

13- absorb water and nutrients from the soil.

- a- Roots b- Stem c- Leaves

14- Plants use the energy of to make photosynthesis process.

- a- sugar b- carbon dioxide c- sunlight

15- Plant needs, and to make photosynthesis process.

- a- Oxygen, Water and sunlight
b- Carbon dioxide, water and sunlight
c- water, nutrients and sunlight

16- Which of the following is necessary for plant in initial growth?

- a- soil b- water c- sunlight

17- this process is known as process.

- a- photosynthesis b- Respiration c- Germination

18- The liquid substance that plant, animal and human needs to survive is

a- soda

b- juice

c- water

19- Plant consists of stem, and

a- Roots and leaves

b- fruits and leaves

20- Plants and Human are similar in their basic needs to survive such as and

a- water and rocks

b- water and air

c- sunlight and rocks
